Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 4, 6 and 8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Perry et al.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3749

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 5, 7 and 9-11 rejected under 35 U.S.C. 103(a) as being unpatentable over Perry et al. in view of Auer et al. Perry et al. discloses the claimed invention except for the barrel door. Auer et al. teaches that it is known for blending doors to be barrel shaped as set forth at paragraph [0017]. It would have been obvious to one having ordinary skill in the art at the time the invention was made for the blend door of Perry et al. to be barrel shaped, as taught by Auer et al. in order to provide another well known suitable shape for a blend door.

Response to Arguments

5. Applicant's arguments, see the fourth paragraph in Remarks/Arguments, filed August 5, 2004, with respect to the rejection(s) of the claim(s) under 102 have been fully considered and are persuasive because the Examiner read the pie shaped portion of the door which pivots on the pivot rod as the claimed baffle. However, the word **baf·fle** (băf'el) *noun*¹. A usually static device that regulates the flow of a fluid or light.¹ Since the pie shaped portion does not regulate air flow, the rejection has been withdrawn.

6. No drawing was received on August 5, 2004 as indicated in applicant's remarks.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
